

→ **GEMINI  
DOOR PANEL**

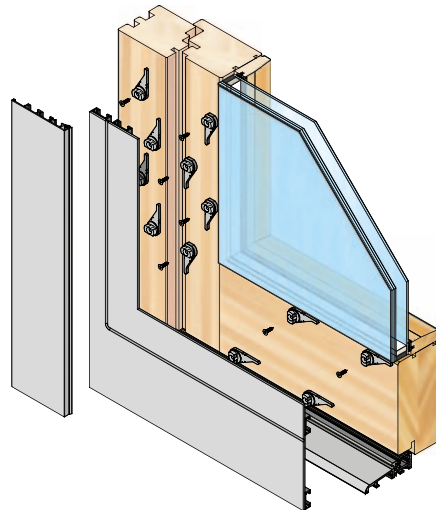

An entrance door should be a combination of solid security and functionality as well as gorgeous looks. It should also guarantee long-lasting durability. Therefore, a door with an externally mounted aluminium panel is worth the effort. A variety of visual designs offers limitless arranging possibilities as well as a harmonious fit into the existing environment.

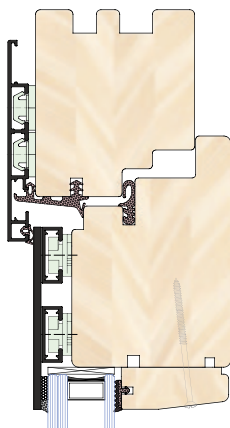

**THE GEMINI SYSTEM ALUMINIUM DOOR PANEL STANDS OUT THANKS TO:**

- A perfect combination of aesthetics, durability and functionality of aluminium
- Custom design – milling of any shape
- A wide range of colours
- Flushed and unflushed versions
- Standard panel thickness 3 to 4 mm
- The possibility of replacing the panel in the future
- Above average durability
- Quick and solid mounting on wooden door with system clips

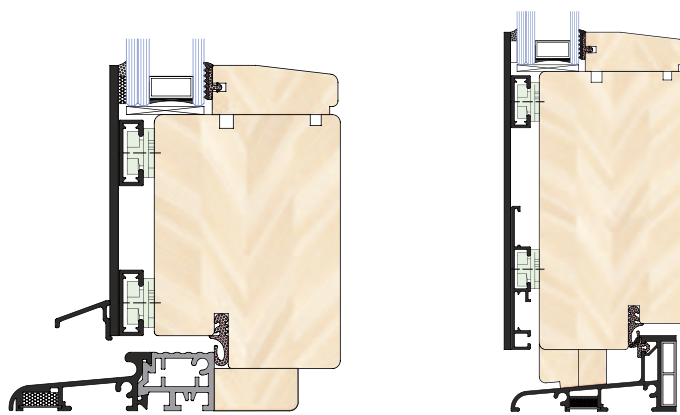

Door panel – mounting

Door cross-section – top

Door cross-section – bottom

Inward opening door

Outward opening door

GEMINI aluminium panels make use of the perfect blend of high durability of aluminium and aesthetics of wood. The application of environmentally friendly wood makes for a warm and cozy interior while the external use of aluminium guarantees the sustainability of the door for years to come.
