

LEAN-TO

Changing the shape of conservatories

A lean-to is an ideal alternative to a traditional conservatory and adds a sleek and modern design to any home.

“ A MODERN TAKE ON THE CONSERVATORY ”

Perfect for creating additional space, the single sloped Atlas lean-to can be any width and can project into your garden for up to about four metres. The Atlas lean-to can be installed just about anywhere.

It is the perfect style for bi-fold doors so you can dramatically open up your home to your garden. The variable roof pitch gives you a huge choice of looks, from fitting it under the first floor window ledges or right up to the eaves. Clean lines and minimal fuss.
