

## Installation

It's in our best interest to supply each customer with windows and doors perfectly fitting each individual project. We can provide support and guidance how to measure window openings, to advice what is required for fitting and how to take care of the windows to ensure their long lasting functionality.\*

Our **Uni Windows** technician can visit your site to take proper measurements before manufacturing the windows, can advise on the products and can give training to the workers performing the installation, should you choose Uni Windows Supply Only.\*

We recommend however to have the windows and doors installed by us. The **installation** is carried out by **Uni Windows** trained and well experienced technicians who know the products inside out, some of them had been manufacturing windows in the past and are dedicated to perform the fitting to the highest standard. Even if you trust your builder/joiner, we can assure you that nobody can do the job to the same standard as we do.

Benefits of choosing the installation with **Uni Windows**:

- team of dedicated **skilled professionals**;
- **Uni Windows** trained technicians with 'inside out' **product knowledge**;
- fulfilment of the **fitting criteria** unique to each product;
- full product **warranty** and installation **warranty**;\*\*
- setting and adjustment of each installed product to ensure its proper **functionality**;
- secure **fitting** of the frames with adequate fixing cleats;
- impermeable thermal **insulation** and firm **fastening** of frames with specialized expanding foam;
- accurate **levelling** of the windows and doors ensuring their stability and functioning;
- professional **glazing** of units if required (mostly large glazed units);
- safe **hinging** of the leafs (if required in installation);
- superb silicon finish all around to ensure **water tightness**;
- proper cleaning and rubbish removal.

*Disadvantages of choosing the installation with your builder, based on our real life experience:*

- *danger of damage by unskilled fitting;*
- *lack of knowledge of our products;*
- *limited product warranty and no warranty on installation;\*\**
- *fitting may not be secured enough;*
- *uncertainty that the thermal insulation, levelling, fastening is properly done;*
- *problems might take years to appear;*
- *broken glazed units if operated with lack of care or by someone not trained to fit glazing units;*
- *risk to unsafe hinging which could lead to the window or door poor function.*
